Change impact	
Risk assessment	<ul style="list-style-type: none"><li>■ Marketing material such as photos might need replacing.</li><li>■ Repositioning: if the adhesive is used, re-positioning/removal can leave residue and take longer than magnet-only mounts.</li><li>■ Surface sensitivity: adhesion quality depends on a clean, dry, suitable surface; contaminated or textured surfaces may reduce bond strength.</li><li>■ No functional change: RF performance and dimensions remain the same; existing device compatibility is unaffected.</li></ul>
Suggested implementation plan	Information included in this PCN will help adapt to the upcoming changes. For more detailed information, please contact your sales representative.
