

DECLARATION OF SOFTWARE SECURITY

23rd of January, 2025

Kaunas

Manufacturer: TELTONIKA NETWORKS UAB
Manufacturer Address: K. Barsausko st. 66, LT-51436, Kaunas, Lithuania
Product Name: RMS (Application and external IT infrastructure)

TELTONIKA NETWORKS UAB hereby confirms that the RMS Web application and External RMS Infrastructure was tested by the **NetSPI**.

RMS Web application was tested by NetSPI consultants who used combination of automated tools and manual penetration testing processes to identify missing, broken, and improperly used application security controls. NetSPI security consultants attempted to penetrate or circumvent existing security mechanisms by using tools, exploit scripts, and techniques that are like those used by attackers. The testing targets common vulnerabilities, including the OWASP Top Ten (<http://www.owasp.org>) and other flaws typical of similar applications. Testing confirmed that vulnerabilities of the following severities were remediated:

- 3 low severity vulnerabilities

External RMS Infrastructure was also tested by NetSPI consultants with an attempt to gain unauthorized access to high value systems, applications, and sensitive information and to identify common security issues that could adversely affect the confidentiality, integrity, or availability of UAB TELTONIKA NETWORKS systems and data. Multiple commercial and open-source security tools, custom scripts, and manual techniques to scan for, identify, and exploit vulnerabilities within the systems and devices were used. Testing confirmed that vulnerabilities of the following severities were remediated:

- 1 high severity vulnerability
- 3 medium severity vulnerabilities
- 1 low severity vulnerability
