| Change type | Hardware change |
| Detailed description | <p>Starting from Q2 2024, RUT951 routers will be manufactured with updated MAIN and RF PCB revisions. The following are the detailed updates made to the MAIN and RF boards:</p> <ul style="list-style-type: none"> • Added new USB HUB • Added new USB-UART ICs • Added new ADC • Added SIM card presence triggers to SoC GPIO • Added shift register clearing circuitry • Added pull-down resistors on pins to address potential issues that may arise when shift registers are in the tri-state high-z state. <p>Please note that this change will be implemented gradually, throughout a 3-month transitional period starting from Q2, 2024. During this period, your shipments of RUT951 may consist of either the current packaging or the new one described above.</p> |

Change impact

| | |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Risk assessment | New hardware support starts from RUT9M_R_00.07.06 FW version, older FW versions will not be compatible. Custom firmwares created from an SDK will need adjustments for a new SDK version. |
| Suggested implementation plan | Firmware downloads for the device can be found here . For more detailed information please contact your sales representative. |

Acknowledgement of PCN receipt

If no feedback is received within two weeks after the issue date of this notification - Teltonika may accept that this change has been tacitly accepted and can implement the change as indicated above.
