- [1 Introduction](#)
- [2 How to check IPs](#)

Introduction

This article lists IP addresses and TCP/UDP ports used by the Teltonika Networks **RUT FOTA** and **OPKG** servers. Devices must access these IPs and ports to ensure software updates and package downloads.

Name of server	Domain	IP address	TCP ports
RUT FOTA	rut.teltonika.lt	3.120.7.82	5000, 8888, 9999
Package Manager	opkg.teltonika-networks.com	3.66.40.246	80, 443

Note: New IP addresses may be used in the future. In this case, check the IP addresses using DNS checking tools.

How to check IPs

To check currently used IP addresses, please visit following links:

For **RUT FOTA**: <https://dnschecker.org/#A/rut.teltonika.lt>

For **OPKG**: <https://dnschecker.org/#A/opkg.teltonika-networks.com>
