Summary

AP Safe Oy security systems provides a solution to using the RUT240 outdoors by enclosing it into a sturdy waterproof lock box making it protected from environmental damages and unwanted tinkering.

Customer profile

AP Safe Oy is a company that specializes in security systems and other security products in Uusimaa, Finland. They work from Helsinki and sell security systems and products and manage them through installation, maintenance and design throughout the country. They have been providing their trusted services since 1992.

Challenge

The customer was looking for a reliable router to incorporate into their outdoor networking solution project.

Solution

Teltonika's RUT240 routers' compact design, cost-effective price and reliable, mission-critical cellular communication features sealed the deal and they were integrated into the customer's outdoor router solution product.

Benefits

The RUT240 router guarantees quality in communication and its sleek and slim design makes it perfect for integration into other systems. Better yet, its remote management capabilities provide complete control of the router from any remote location and the two LTE antennas that it comes with ensure the best signal anywhere that the router is placed.
