

# RUT850 Remote Monitoring & Administration

[Main Page](#) > [RUT Routers](#) > [RUT850](#) > [RUT850 Manual](#) > **RUT850 Remote Monitoring & Administration**

RUT850 supports multiple monitoring and administration possibilities.

## Contents

- [1 Remote control options](#)
  - [1.1 RMS](#)
  - [1.2 Public IP](#)
    - [1.2.1 HTTP access](#)
    - [1.2.2 SSH access](#)
  - [1.3 SMS](#)
  - [1.4 JSON-RPC](#)
  - [1.5 VPN](#)
  - [1.6 TR-069](#)

## Remote control options

The RUT850 router supports the following remote control capabilities:

Remote control method	Can get parameters	Can set parameters
<a href="#">RMS</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">SSH</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">HTTP</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">SMS</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">JSON</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">VPN</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">TR-069</a>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

## RMS

The **Remote Management System (RMS)** is designed to conveniently monitor and manage all your Teltonika networking devices. The system allows to securely gather status information of your devices and to change their configuration even if the devices do not have public IP addresses.

RMS access can be configured from the **System** → **Administration** → [RMS](#) page.

## Public IP

If you're using a SIM card that has a Public IP address (refer [here](#) for more information), you can

reach the router via HTTP or SSH via its WAN IP address.

## HTTP access

---

Remote **HTTP** access can be set up via the **System** → **Administration** → [Access Control](#) page.

## SSH access

---

Remote **SSH** access can be set up via the **System** → **Administration** → [Access Control](#) page.

## SMS

---

The router can be controlled via **SMS messages** using SMS utilities rules. SMS can be configured via the **Services** → **SMS Utilities** → [SMS Rules](#) page.

## JSON-RPC

---

**JSON-RPC** access can be set up via the **System** → **Administration** → [Access Control](#) page.

## VPN

---

**Virtual Private Networks (VPNs)** provide multiple flexible options on setting up remote access to the router and its LAN network. For more information on different types of VPNs supported by RUT850, visit the [VPN manual page](#).

## TR-069

---

**Technical Report 069 (TR-069)** is a technical specification of the Broadband Forum that defines an application layer protocol for remote management of customer-premises equipment (CPE) connected to an Internet Protocol (IP) network. For more information on TR-069 in RUT850, visit the [TR-069 manual page](#)
