Summary

The **Overview** page contains various information summaries and shortcuts to other pages. It is also the homepage of the WebUI. This chapter is an overview of the Overview page for RUT950 devices.

Overview

The Overview page contains **widgets** that display the status of various systems related to the device. The figure bellow is an example of the Overview page:

Mobile widget

The **Mobile** widget displays information related to the mobile connection and the current **signal strength** (). Each filled-up bar represents a different RSSI value:

bars	signal strength value / RSSI (in dBm)
0	≤ -111
1	-110 to -97
2	-96 to -82
3	-81 to -67

4	-66 to -52
5	$\geq$ -51

The same calculation principle applies to the **Signal strength LEDs** located on your device. You can find more information on signal strength values and different measurements [here](#).

Widget button: Info

The **Info** () button is located next to the name of some widgets. Clicking the Info button redirects the user to a status page related to the widget's displayed information. For example, clicking the Info button on the Mobile widget would redirect the user to the **Status** → [System](#) page:

Widget button: Settings

The **Settings** button is located next to the name of some widgets. Clicking the Settings button redirects the user to a configuration page related to the widget's displayed information. For example, clicking the Info button on the Mobile widget would redirect the user to the *Network* → *Interface* → *LAN Configuration* page:

Widget button: Wiki

The **Wiki** () button is located on the right of the title of some widgets. Clicking the Wiki button redirects the user to a page on this Wiki related to the widget's displayed information. For example, clicking the Wiki button on the RMS widget would redirect the user to the [RMS](#) page on this Wiki:

Adding more widgets

There is a default set of widgets displayed in the Overview page, but more can be added from the **System** → **Administration** → [Overview](#) page.
