The **Japan Radio Law** covers all products which utilize the radio spectrum and operate under 3 THz. Specified Radio Equipment Devices are subject to mandatory approvals. It aims at increasing public welfare by securing fair and efficient use of an electric waves. Testing is conducted on one sample unit for each type of radio equipment (officially called "construction design"), for attestation of the construction design. This is called the "construction design attestation system."

Description

This certification applies to all products using the radio frequency spectrum. The Giteki mark is a visible indication of a product's compliance with applicable Japans regulatory arrangements, including all technical and record-keeping requirements.

RUTM50 Certification numbers

Specified Radio Equipment certification number [R] No.: **018-240115**

Construction Type Certificate certification number [T] No.: **D24-0014018**

Device Approvals

Device Construction Type
Certificate (MIC (2.4G Wi-Fi))

Device Construction Type
Certificate (MIC (5G Wi-Fi))

Device Construction Type
Certificate (JATE)
