

Software Development Kit

[Main Page](#) > [General Information](#) > **Software Development Kit**

A **software development kit (SDK)** is a set of software development tools that provides the possibility to create applications for a certain software package, software framework, computer system or similar development platform.

TELTONIKA NETWORKS UAB provides SDKs for its products. Software created with these SDKs is developed under a [General Public Licence \(GPL\)](#). You can download SDKs from one of the links in the section below.

SDK downloads

Device(s)	Version	Date	File size	MD5 checksum	Download link
