

Talk:RUT240 Firmware Downloads (legacy WebUI)

Does someone know why the router loses the SSID and the internet connection (if WiFi stops) and it must fall back to 4G. The fall back doesn't work properly. Any experiences?

Fall back from WiFi to 4G doesn't work properly

Does someone know why the router loses the SSID and the internet connection (if WiFi stops) and it must fall back to 4G. The router is the blocked and the fall back is not available. Any experiences or tips?
