SIM switch question

Dual Simm option: Under what circumstances does the unit switch over from the primary to the secondary simm and when does it go back to the primary simm?. Also, what is the time delay when switching over?

Answer

The SIM card switches only on specified events (e.g., low signal, no network, etc.). That is to say it will never switch from primary to secondary SIM unless a SIM switch rule(s) is specified by the user. More information on that [here](#).

Also, I would suggest asking questions in Teltonika's Crowd Support forum. You are more liable to get an answer there: <https://community.teltonika.lt/>

Using RUT240 with 1 antenna

Can I use my RUT240 with only 1 antenna?

Answer

Yes, you can. If you're only using one, use the connector on the right side of the panel:
https://wiki.teltonika-networks.com/view/RUT240_front_and_back_panels#Main.2FAux_antenna_connectors

Also, you are more likely to receive a response if you ask your questions in our Crowd Support Forum: <https://community.teltonika.lt/networking>

o2 Telefonica as operator

I have a o2 SIM card but o2 is not listed in the operator list. What can I do?
