Summary

Teltonika ID - smart solution which provides two-factor authentication that adds an additional layer of security to the authentication process. Teltonika ID application is designed to prevent unauthorized users from gaining access to your RMS account even if your username and password were compromised.

Download and install Teltonika ID

You can download Teltonika ID app into your smartphone or tablet from [Google Play](#) and [App Store](#).

QR code for Google Play

QR code for Apple App Store

After installing the app you will be asked to enter an email address and confirm it. After confirmation, you will have to create four digits PIN code and confirm it.

Set up Teltonika ID on RMS

To set up 2-step verification with Teltonika ID login to your RMS account in the top right corner click on your **username** and in the dropdown menu select **User settings**

https://wiki.teltonika-networks.com/view/File:Rms_teltonika_device_register_v2.mp4

Step by step instructions.

In the **User settings** page, you will see a field called **2-STEP VERIFICATION** where you will be able to select **Teltonika ID** as verification type.

After selecting the verification type and saving the settings you will be asked to confirm your password and add a verification device.

Open Teltonika ID app in a smart device and in the top left corner click on  icon and select **Pair a system** and enter registration code.

Log in with Teltonika ID

After successfully setting up Teltonika ID next time when you will try to login to RMS account after entering your username and password notification will be sent to your Teltonika ID application and you will be asked to verify login with PIN code or fingerprint.

In situations where more than one device will be added notification will be sent to all devices and the user will be able to verify login or ignore it.
