

# Template:Networking rutx manual device recovery sms

## SMS

---

You can perform a factory reset with the SMS Utilities **restore** rule. If the rule hasn't been disabled or changed in any way, all you need to do is send an SMS message to the router containing the text:

**<router\_password> restore**

Replace *<router\_password>* with your actual password. You can find more information on SMS Utilities rules [\[\[{{{name}}} Mobile Utilities#SMS\\_Utilities|here\]\]](#).
