

# Template:Rms manual files fw files add new firmware

To upload a firmware file go to the RMS web page, Left sidebar panel, [Files](#) tab and click on **Firmware** submenu.

1. Scroll your mouse pointer to the Top control **Files** menu (**Files** → **Add new**).
2. Click **Add file** button, select the config file that you wish to add from your computer.
3. (Optional) you can enter a short description for your firmware file.
4. Click **Upload** if successful your file will appear in the top of the Firmware table.

At the top of your screen, you will get a notification in green text: **File uploaded**.

---

## Downloading firmware files

To upload a firmware file, you must first obtain one. You can download firmware for different RUT devices from these links:

- [RUT230 Firmware Downloads](#)
- [RUT240 Firmware Downloads](#)
- [RUT850 Firmware Downloads](#)
- [RUT900 Firmware Downloads](#)
- [RUT950 Firmware Downloads](#)
- [RUT955 Firmware Downloads](#)
