

Template:Rms manual fota unregister

The **Unregister** function is used to remove devices from FOTA.

- Select the device(s) that you would like to remove:

-
- Scroll your mouse pointer to the Device submenu (**Fota** → **Fota** → **Device**) and click "Unregister":

-
- You will be prompted by a pop-up asking whether you really want to remove the selected device(s). If you are ready to proceed, click "Yes":

The device(s) should no longer be visible in the FOTA device table.
