

USB-Ethernet Routing (TRB140)

[Main Page](#) > [FAQ](#) > [Networking](#) > **USB-Ethernet Routing (TRB140)**

On TRB140 when trying to reach ethernet interface from USB interface, it is blocked by default on the bridged LAN. To unblock it, navigate to **Network > Firewall** menu and change "**Forwarding**" action from "**reject**" to "**accept**" in lan rule.
