bootloader update

hallo

i have firmware 1.0 and i updated in the latest version. Now i can not edit the setings from the rut955 it is in SAFE mode !!

i have tray to install de new bootloader 192.168.1.1/bootloader.html but that is not working.

and now i can not log in the rut

what must i do ?

Suggested edit

On the page https://wiki.teltonika-networks.com/view/TRB140_Powering_Options can I suggest saying that the image of the plug is taken from the rear to avoid a reverse polarity situation?

I tried to edit directly but it says the page is protected.
