

Wi-Fi access in public transportation

[Main Page](#) > [RUT Routers](#) > [RUT240](#) > [RUT240 Usage Scenarios](#) > [RUT240 Success Stories](#) > **Wi-Fi access in public transportation**

Whether it be business or pleasure, the need to stay connected is only increasing. At some point in the future, getting free Wi-Fi access on the go will probably become easier than getting a cup of coffee or finding a good book to read. Teltonika is working on speeding up the process of bringing that future to a reality.

Summary

Malta Public Transport and Transport Malta have launched a pilot project that equipped fifty public buses with free Wi-Fi access. The system was designed and installed by HandsOn Systems.

Challenge

Creating a reliable, high speed mobile Wi-Fi zone capable of supporting multiple users at any point in time.

Solution

Teltonika routers were installed in some of Malta's public buses effectively making them free mobile Wi-Fi zones for everyone.

Benefits

Using RUT240 routers is an easy and economic way to achieve a mobile Wireless connection since they are capable of high performance LTE and managing dozens of Wi-Fi clients at any moment.
