

Construction monitoring

[Main Page](#) > [RUT Routers](#) > [RUT950](#) > [RUT950 Usage Scenarios](#) > [RUT950 Success Stories](#) > **Construction monitoring**

When thousands if not millions of dollars are poured into construction projects it makes zero sense to not try and protect that kind of investment. Be it vandalism, material pilfering, equipment misuse or such a mundane task as keeping all the staff on work sites in check takes a lot of effort and resources. That's why a construction monitoring helps one to be on top of things 24/7 and deal with those serious issues.

Summary

The cabinet contains a industrial 4G Router from the Teltonika model RUT950 connected to Hikvision DS-2DF6225X-AEL PTZ Camera. It will patrol different zones and alert the movement.

Challenge

Cabinet should be as small and tidy as possible for easy installation out in the field. The Cabinet will sit out in the woodland and monitor a construction and its machines.

Solution

Using a RUT950 router
