OTD Outdoor routers

[Main Page](#) > **OTD Outdoor routers**

OTD is a series of outdoor routers designed for outdoor usage with Ingress Protection (IP) against solids and water. These outdoor routers can be powered by active PoE devices via its RJ45 port. Supports features such as cellular connectivity, remote equipment monitoring and control, Ethernet connectivity and many others.

Here you will find technical documentation links for all TAP series devices. If you can't find what you're looking for, try using the search bar located at the top-right side of the page, register your question on our [Crowd Support forum](#) or suggest an edit to our technical support team.
