Portable Arlo Camera Kit

GoTEK7 has created a **Portable Arlo Camera Kit**, which may be one of the most simple camera deployment systems in the world.

☐

Contents

Summary

A customer has designed a **Portable Arlo Camera Kit** with a RUT240 router inside. It comes with a 12 V lithium-ion 25.6 Ah battery inside, which can be charged via their power packs and also give additional power to other devices. The kit supports up to 10 camera's, each of which can be added by single press of a button and can be managed via a mobile App.

Customer profile

GoTEK7 is a provider of GPS trackers that are designed specifically for live tracking in real time around the globe, from your computer, tablet or smart phone.

Challenge

Supplying the kit with a 4G cellular connection and remote control capabilities.

Solution

Introducing Teltonika's RUT240 into the solution.

Benefits

When your solution requires an extremely flexible router that's easy to deploy and utilize, you can't go wrong with Teltonika's RUT240. Compact in its size but impressive for its capabilities, RUT240 ensures you have everything you need to equip your system with a 4G Internet connection and [versatile management benefits](#).
