RUT361 Services

<u>RUT361 WebUIl</u> > <u>RUT361 Status section</u> > **RUT361 Services**

The information in this page is updated in accordance with firmware version **RUT361 R 00.07.07.1**.

Contents

- 1 Summary
- 2 Services

Summary

The **Services** page is used for easy service management. From here you can check the status of most services and find a link to each of their configuration pages.

If you're having trouble finding this page or some of the parameters described here on your device's WebUI, you should **turn on "Advanced WebUI" mode**. You can do that by clicking the "Advanced" button, located at the top of the WebUI.

Services

The **Services** list displays the status of most of the device's services.

Additional notes:

- The figure above is only an example. The actual ordering of the services on your devices will differ.
- Most services can be configured from the WebUI's 'Services' tab. Search the <u>RUT361 Services</u> section for guidance.
- The rightmost column contains a 'Change Settings' button next to each service. If you click on of these buttons, you will be redirected to the respective service's configuration window.

 <u>For example:</u> if you click 'Change Settings' next to the RMS service, you will be redirected to the Services → Cloud Solution → <u>RMS</u> page.
