Description

The company provides services for several industries including maritime, renewable energy, oil & gas, electrification, food & beverage and healthcare. It was created in 2013 as a result of a merger between two leading organizations in the field - Det Norske Veritas (Norway) and Germanischer Lloyd (Germany).

The DNV GL **Digital Solutions** is a provider of digital solutions for managing risk and improving safety and asset performance for ships, pipelines, processing plants, offshore structures, electric grids, smart cities and more.

Standards applied

RUT950 conforms to following standards of the "Environmental test specification for electrical, electronic and programmable equipment and systems" class guideline:

Standard	Test description	Article
EN 60068-2-6:2008	Sweep sine vibration test	DNVGL-CG-0339:2016, Class A - Section 3, Article 6, Class A

Disclaimer:

Test reports that are referenced in declarations and certificates can be provided upon request. For the request to be approved, the recipient of the test reports should be a certification authority or certified test house. The recipients will be asked to sign a non-disclosure agreement (NDA).
