Description

With PTCRB certification, operators and device manufacturers are confident of a device's interoperability with mobile networks.

Established in 1997 by leading wireless operators, PTCRB defines the test requirements to verify compliance with global industry standards for wireless cellular devices. Member operators are committed to ensuring device quality through a rigorous certification process. Without PTCRB certification, manufacturers run the risk that their devices will be blocked on wireless networks.

Attachments

RUT950 devices (manufactured under RUT950 **J******* product codes) are PTCRB certified and can be found on the PTCRB website among certified devices:

RUT950 devices (manufactured under RUT950 **W******** product codes) are PTCRB certified and can be found on the PTCRB website among certified devices:

Disclaimer:

Test reports that are referenced in declarations and certificates can be provided upon request. For the request to be approved, the recipient of the test reports should be a certification authority or certified test house. The recipients will be asked to sign a non-disclosure agreement (NDA).
