

RUT950 on boat installation

[Main Page](#) > [RUT Routers](#) > [RUT950](#) > [RUT950 Usage Scenarios](#) > [RUT950 Success Stories](#) > **RUT950 on boat installation**

These days many full service marinas are now offering free WiFi access to slip holders and transient boaters. Internet access has become a welcomed amenity for boaters that need to occasionally work remotely (at their “office” on the water) or simply want the ability to get online while on their boat.

Summary

Teltonika RUT950 was installed on a ship to provide internet connection via the mobile phone network. Internet connection is destined for passengers and devices on the ship. We use marine type 4G External antenna to optimize signal reception and performance while in the waters. The solution shows results with exceptional data transmission speeds.
