

RUT955 Inputs in Security Applications

[Main Page](#) > [RUT Routers](#) > [RUT955](#) > [RUT955 Hardware Application Examples](#) > **RUT955 Inputs in Security Applications**

RUT955 digital input can be used for security purposes. You can connect PIR sensor, reed switch, or hall sensor to RUT955 digital input. Then configure RUT955 input (refer to this page for additional information [Input Rules](#)). It could also be used to turn on alarms on digital output or to send SMS messages.

Note: configuration is different for each digital input.

Using RUT955 Digital input example:

Note: you can only connect passive sensors to RUT955' digital input.

Using RUT955 digital isolated input example:
