RUTX08 CITC

The Communications and Information Technology Commission (CITC or the Commission) is mandated, in accordance with the Telecommunications Act, Telecom Act Bylaw and CITC Ordinance, to license telecommunications and information technology equipment in the Kingdom of Saudi Arabia

Description

CITC mandates that network-based devices must support 4G/LTE technology as a prerequisite for approval of such equipment in Saudi Arabia. Hence, 2G and 3G only devices can no longer be approved and certified in the Kingdom. This specification has come into force on January 2020 and has been communicated as part of the country's network infrastructure improvement.
