RUTX11 Logging in

<u>Main Page</u> > <u>RUTX Routers</u> > <u>RUTX11</u> > <u>RUTX11 Manual</u> > **RUTX11 Logging in**

Configure your computer (Windows)

 Enable the Ethernet network connection (go to Start → Control Panel → Network and Internet → Network and Sharing Center. In the left panel click the Change adapter settings link. Right click on Ethernet Network Connection and select Enable).

×

- 2. Setup Ethernet network adapter on your computer (right click on **Ethernet Network Connection** and select **Properties**. After that select **Internet Protocol Version 4 (TCP/IP)** and click **Properties**).
- 3. Select **Obtain IP address** and **Obtain DNS server address automatically** if they are not selected. Click **OK**.

×

Login to device

- 1. To enter the router's Web interface (WebUI), type http://192.168.1.1 into the URL field of your Internet browser.
- 2. Use the following login information when prompted for authentication:

×

- 3. After you login, you will be prompted to change your password for security reasons. The new password must contain at least 8 characters, including at least one uppercase letter, one lowercase letter and one digit. This step is mandatory and **you will not be able to interact with the router's WebUI before you change the password**.
- 4. When you change the router's password, the Configuration Wizard will start. The **Configuration Wizard** is a tool used to setup some of the router's main operating parameters.
- 5. Go to the **Status** \rightarrow **Network** page and pay attention to the **Signal Strength** indication. To maximize cellular performance try adjusting the antennas or changing the location of your device to achieve the best signal conditions (you can find information on signal strength recommendations <u>here</u>).
