

TAP Access Points

[Main Page](#) > **TAP Access Points**

TAP is a series of access points designed for strengthening Wi-Fi coverage in small enterprise and commercial spaces. These PoE-in access points can be powered by active PoE devices via its RJ45 port and was designed with simplicity and ease of installation in mind.

Here you will find technical documentation links for all TAP series devices. If you can't find what you're looking for, try using the search bar located at the top-right side of the page, register your question on our [Crowd Support forum](#) or suggest an edit to our technical support team.
