Description

SRRC tests must be conducted at a testing laboratory in China accredited by the Ministry of Industry and Information Technology (MIIT). This authority emerged from the Ministry of Information Industry in 2008 and is responsible for the supervision and development of information technologies.

After completion of the SRRC certification, products can be imported into China. It is mandatory to affix the label with a CMIIT (Chinese Ministry of Industry and Information Technology) ID on it. This is the ID that the manufacturer receives as part of the SRRC certification process so that the products can be imported into China or sold on the Chinese market.

TRB142

The following CMIIT ID has been assigned to TRB142:

TRB142 CMIIT ID: **2022CJ19058**
