TRB142 Static Routes

Contents

- <u>1 Summary</u>
- <u>2 Static routes</u>

Summary

Static routes specify over which interface and gateway a certain host or network can be reached. This chapter is an overview of the Static Routes page in TRB142 gateways.

The information in this page is updated in accordance with the $\[TRB1420 _ R_00.01.05 \]$ firmware version.123

Static routes

To find information on static route configuration, refer to the figure and table below:

×

Field	Value	Description
Interface	mobile lan; default: mobile	The zone where the target network resides
Target*	ip4; default: 0.0.0.0	The address of the destination network
Netmask*	netmask; default: 255.255.255.255	A Mask that is applied to the Target to determine to what actual IP addresses the routing rule applies
Gateway	ip; default: none	Defines where the router should send all the traffic that applies to the rule
Metric	integer; default: 0	The metric value is used as a sorting measure. If a packet about to be routed fits two rules, the one with the lower metric is applied.
MTU	integer [649000]; default: 1500	Sets the maximum transmission unit (MTU) size. It is the largest size of a protocol data unit (PDU) that can be transmitted in a single network layer transaction.

unicast local broadcast multicast unreachable prohibi backhole anycast custom ; default: unicast	
--	--

*Additional notes on Target & Netmask:

You can define a rule that applies to a single IP like this:

- Target: some IP
- Netmask: 255.255.255.255

Furthermore, you can define a rules that apply to a range of IPs. Refer to the table below for examples.

TargetNetmaskDescription192.168.2.0255.255.255.240Applies to IPs in the 192.168.2.0 - 192.168.2.15 range.192.168.2.240255.255.255.240Applies to IPs in the 192.168.2.240 - 192.168.2.255 range.192.168.2.161255.255.0.0Applies to IPs in the 192.168.0.0 - 192.168.255.255 range.192.168.2.161255.255.255.255Only applies to 192.168.2.161.
