Telit deviceWISE

Description

Telit deviceWISE is real time industrial IoT management platform that could be integrated between any machine, data base, enterprise system or/and cloud solution which is now compatible with Teltonika devices.

In order to install Asset Gateway for Teltonika TRB/RUT devices, please follow instruction in [Telit manuals page](#)

Note: deviceWISE integration to Teltonika products is tested on the following devices and firmware versions:

- Teltonika RUTX09 02.05.571
- Teltonika TRB140 02.05.571

The firmware must be running GLIBC, as muslc-based firmwares are not supported. For more information, contact your vendor.

Disclaimer

This page describes installation of a third party (Telit deviceWISE) platform package, which was not developed by Teltonika Networks. Teltonika Networks is under no circumstances responsible for, including but not limited to, package's compatibility with the rest of Teltonika's Networks functionality, interoperability with other services, security or general stability. The user of this package acknowledges and agrees that the Teltonika Networks shall not be responsible or liable, whether directly or indirectly, for any damages or loss caused or sustained by the user, in connection with any use or reliance usage of said package.
