

Template:Networking device manual modbus modbus tcp get parameters table asterisk

* All received/sent data usage values are returned in **kibibytes (KiB)**, which is an ISQ standard accepted by most major standard organizations.

1 kibibyte (KiB) = 2^{10} bytes = 1024 bytes

1 mebibyte (MiB) = 2^{10} kibibytes (KiB) = 2^{20} bytes = 1 048 576 bytes
