

Template:Networking rut manual services

The information in this page is updated in accordance with firmware version .

□

Contents

- [1 Summary](#)
- [2 Services](#)

Summary

The **Services** page is used for easy service management. From here you can monitor your device's services states. Click a button to access respective section where it was originally configured.

This chapter of the user manual provides an overview of the Services page for {{{name}}} devices.

Services

The **Services** page displays the status of most of the device's services. Services that are currently inactive are displayed in a red font, while active ones are highlighted in green.

The figure below is an example of the Services page:

[[File:Networking_{{{name}}}_manual_services.png|border|class=tl-t-border]]

Click the zone next to a service where it says "Change settings" and you will be redirected to configuration page.

Additional notes:

- By default, only [[{{{name}}} NTP|NTP]] and [[{{{name}}} SMS Utilities|SMS Utilities]] services are enabled
- Some services have to be installed via [[{{{name}}} Package Manager|Package Manager]], before they can be visible.
