

Template:Networking rutx manual device recovery sms

SMS

You can perform a factory reset with the SMS Utilities **restore** rule. If the rule hasn't been disabled or changed in any way, all you need to do is send an SMS message to the router containing the text:

<router_password> restore

Replace *<router_password>* with your actual password. You can find more information on SMS Utilities rules **[[{{{name}}}] Mobile Utilities#SMS_Utilities|here]]**.
