Template:Networking trb1 firmware downloads legacy upgrade

In order to upgrade the firmware (FW) from **{{{name}}}X_R_00.01.06.1 or older** to any newer version, please follow these instructions:

1. **Find your device's Product Code**. It is on the bottom sticker of the device or on the package.
2. Depending on the Product Code, **download one of these .bin files**:
    - For codes beginning with {{{name}}} **0**: [[Media:{{{name}}}0_R_00.02.03.2_LEGACY.bin|{{{name}}}0_R_00.02.03.2_LEGACY.bin]]
    - For codes beginning with {{{name}}} **1**: [[Media:{{{name}}}1_R_00.02.03.2_LEGACY.bin|{{{name}}}1_R_00.02.03.2_LEGACY.bin]]
3. Login to your {{{name}}} device and **navigate to the System → [[{{{name}}} Firmware|Firmware]] page**.
4. Upload the .bin file as if it were a regular FW file and **click the 'Upgrade' button**.
5. Wait a few seconds while the file uploads. Then **click the 'Proceed' button** in the next page.

After the upgrade is done, you will no longer need to follow these instructions for future upgrades. To upgrade the firmware from TRB1_R_00.02.03.2 to later versions, simply download a FW file from [[{{{name}}} Firmware Downloads|Firmware Downloads]] and upgrade as usual.
