

# Template:Rms manual management commands configuration

The **Configure device** option allows you to modify configuration for your selected device(s). To configure your devices go to the RMS web page, Left sidebar panel, (**Management** → **Devices**) and click on **Devices** submenu.

Scroll your mouse pointer to the Top control **Configuration** menu and select **Configure device** (Configuration → Configure device).

The **Configuration** function is used to change configuration of devices selected from your device table. You will get different configuration options depending on the device.

## Step by step instructions

---

1. Select the device(s) that you wish to configure.
2. Move your mouse pointer to the **Configuration** menu and click **Configure device**.
3. You will get a pop-up box, where you will be able to choose settings you want to configure.
4. Fill out the information and click **Save** button when ready.
5. In the next window will display configuration progress.
6. Click the Close button and close the **Configure devices** window.

## Important!

- Allow some time for your device(s) to load new settings. It might take some time.
