Introduction of type approval

Contents

- [1 Description](#)

Description

Because each country operates a different telecommunications network, some telecommunications equipment can be safely used in one country, but not in another. Type Approval is the term for the process of determining and registering the kind of equipment that can be brought and used in UAE without causing interference or long or short-term damage to the network.

Type Approval is the requirement for Radio and Telecommunications Terminal Equipment (RTTE) to comply with specific technical standards. Such equipment must be registered with the **TRA** before it can be used, sold or distributed in the UAE.
